HEXAPOD 6DOF FULL MOTION FORMULA SIMULATOR

Motion Platform Specifications

1. Six electrical actuators driven by high quality servo motors.
2. 50 Cm Stroke 6Dof Motion Platform
3. Power: 380 VAC 16A 3phase power.
4. Motion with sensitive positioning and high G -Force.
5. Motion Speed 25 cm/Sec with adjustable acceleration/Declaration time.
6. Linear movements: +/- 30cm Heaving, +/- 40cm Surging, +/- 40cm of Swaying.
7. Angular movements: +/- 25 degrees of Pitching, +/- 30 degrees of Rolling, +/- 45 degrees of Yawing.
8. Modbus Interface by RS232 or Ethernet.
9. Max Payload 600kg.
10. All the nuts and bolts used in the mechanism are made of mildew resistant chrome material.
11. Operation Temperature 0 ~ 55 C.
12. Safety : Easy to reach Freeze emergen cy button.
13. Easy to transport with manual wheels.
14. For indoor and outdoor use
15. To be operated by only one person.
16. One year guarantee for all the parts
17. All the above mentioned parts are CE Certified.
